

Share2Care
Data changes lives

Health & Care Partnership
for Cheshire & Merseyside

FINAL v1

**Cheshire and Merseyside
Health and Care Partnership**

**Data Sharing Agreement
(Tier Two)**

**Workstream:
COVID-19 Intelligence**

Data Sharing Agreement Tiered Framework

There are three tiers to the Data Sharing Agreement Tiered Framework:

Tier Zero Memorandum of Understanding

Overarching Memorandum of Understanding which sets out an organisations agreement in principle to share information with the partner organisations in a responsible way. The tiered approach provides a governance framework to standardise procedures and processes when sharing confidential personal information between partners where there is a lawful basis to do so. The Tier Zero is signed by a Chief Executive (or equivalent) and commits to their organisation operating within the agreed framework of data sharing. Only one Tier Zero needs to be signed regardless of the number of Tier One and Tier Two documents beneath it.

Tier One Data Sharing Agreement - Standards

These are the overarching standards which outline the agreed procedures for sharing confidential information. The document recognises that not all organisations which are party to the agreement will have the same assurance requirements (such as the Data Security and Protection Toolkit) and therefore sets the minimum standard of each of the participating organisations. The document sets the standards for obtaining, recording, holding, using and sharing of information and outlines the supporting legislation, guidelines and documents which govern information sharing between partners. The Tier One is signed by the designated responsible officer for each partner organisation, for the whole C&M Health and Care Partnership.

Tier Two Data Sharing Agreement

The Tier Two provides a template for the safe sharing of personal data. The agreement shows what information should be shared and how, under what circumstances and by whom, and is tailored to individual partnerships/projects. Each Tier Two Data Sharing Agreement will need to be signed off by each participating organisation. Tier Two Data Sharing Agreements could be for all partners at Tier Zero, or a selected cohort of partners who are participating in a specific project. Each Tier Two is signed by the Senior Information Risk Owner (SIRO) and/or Caldicott Guardian (CG), alternatively the Chief Executive or equivalent if there is no SIRO/CG, for each of the partner organisations.

Clause

Sharing agreements negotiated prior to the commencement of the Tiered framework and related Share2Care documentation are not terminated or otherwise varied by the implementation of the Share2Care documentation.

Share2Care recognise that each partner organisation will have their own local policies and procedures regarding information security and confidentiality and to make clear that this Tier Two, and the Tier Zero and Tier One documents, are not designed to negate or supersede existing local policies but to enhance them by facilitating cross-boundary dialogue and agreement.

Tier Two - Data Sharing Agreement

1. Title and Reference Code

Project	Cheshire and Merseyside Health and Care Partnership
Workstream	COVID-19 Intelligence – Combined Intelligence for Population Health Action (CIPHA)
Reference	S2CDOC-ID000023

2. COVID-19 Intelligence

This Tier Two sharing agreement is for:

COVID-19 Intelligence Platform: The Combined Intelligence for Population Health Action (CIPHA Programme)

This sharing agreement covers the sharing of data across Cheshire and Merseyside Health and Care Partnership to support a set of COVID related population health analytics designed to inform both population level planning for COVID recovery and support the targeting of direct care to vulnerable populations.

3. Parties to the Agreement

The sharing agreement is between the 9 Clinical Commissioning Groups, 367 General Practices, 9 Local Authorities, 20 NHS Providers that make up Cheshire and Merseyside Health and Care Partnership and Graphnet/System C as a data processor. The table below explains the organising receiving data as part of this data sharing agreement and those providing data as part of this data sharing agreement.

Agreement Owner	Christine Walters Director of Informatics St Helens and Knowsley Teaching Hospitals NHS Trust
Receiving Organisation(s)	NHS Cheshire CCG NHS Halton CCG NHS Knowsley CCG NHS Liverpool CCG NHS South Sefton CCG NHS Southport and Formby CCG NHS St Helens CCG NHS Warrington CCG NHS Wirral CCG All GP Practices within each of these CCGs (Please see list in Annex A) Alder Hey Children's NHS Foundation Trust Bridgewater Community Healthcare NHS Foundation Trust

4. Terms of the Agreement

Start Date	July 2020
End Date	September 2020 (or extended if the COPI Notice is extended) This agreement will be reviewed annually starting in March 2021 by the IG Strategy Review Group until the end date is reached.

5. Purpose of the Data Sharing

Purpose for Sharing The overarching purpose for data sharing is to support a set of COVID related population health analytics designed to inform both population level planning for COVID recovery and to support the targeting of direct care to vulnerable populations.

This can be broken down into three main sub areas:-

Automated dashboards to support COVID recovery:

This is in the areas of Capacity and Demand; Epidemiology; and Population Stratification.

Pseudonymised Data for place-based local Intelligence

Services: This will include CCG, Local Authority and the Cheshire and Merseyside BI Teams supporting the Out of Hospital cell

Pseudonymised data that cannot be re-identified for Research Organisations.

The purposes of data for local Intelligence Services are those described in the COPI notice for COVID-19

- Understanding COVID-19 and risks to public health, trends in COVID-19 and such risks, and controlling and preventing the spread of COVID-19 and such risks;
- Identifying and understanding information about patients or potential patients with or at risk of COVID-19, information about incidents of patient exposure to COVID-19 and the management of patients with or at risk of COVID-19 including: locating, contacting, screening, flagging and monitoring such patients and collecting information about and providing services in relation to testing, diagnosis, self-isolation, fitness to work,

treatment, medical and social interventions and recovery from COVID-19;

- Understanding information about patient access to health services and adult social care services and the need for wider care of patients and vulnerable groups as a direct or indirect result of COVID-19 and the availability and capacity of those services or that care;
 - Monitoring and managing the response to COVID-19 by health and social care bodies and the Government including providing information to the public about COVID-19 and its effectiveness and information about capacity, medicines, equipment, supplies, services and the workforce within the health services and adult social care services;
 - Delivering services to patients, clinicians, the health services and adult social care services workforce and the public about and in connection with COVID-19, including the provision of information, fit notes and the provision of health care and adult social care services; and
 - Research and planning in relation to COVID-19
-

6. Data Protection Impact Assessment

Data Protection Impact Assessment for Data Sharing (DPIA)

This is a simplified Data Protection Impact Assessment (DPIA) that has been developed for use with urgent Data Protection / IT developments during the COVID-19 Coronavirus outbreak, so as to not delay the development / deployment of essential services during the pandemic. It has been designed (and agreed by NHS Digital) to ensure rudimentary due diligence in line with Data Protection legislation, so as to capture and manage any immediate Data Protection concerns. It does not cover all elements required of a standard DPIA that would be used within a Business As Usual scenario. Consequently, once the immediate pandemic situation has subsided and as denoted by the ending of the COPI notice, the Team implementing the project to which this DPIA relates will complete a full retrospective DPIA, this will be completed as soon as possible and no later than by the end of July 2020.

CIPHA Covid
Intelligence_short_DP

7. Data Details

Data to be The specific data items will only be coded (structured) data, that is to say no free text (unstructured) data. As noted in the section on access

Shared

controls the data will be strictly governed as anonymised-aggregate, pseudonymised and only as person identifiable for the purpose of direct care. Additionally for use cases beyond those given in this agreement there will be the additional governance of a Data Access and Data Asset Group to ensure full compliance of the COVID-19 purpose as stated in this agreement.

Annex B provides tables showing the categories of data to be shared from GP; Acute; Mental Health; Community; and Social Care (children and adult). The table includes a brief description of the data categories and the use case(s) within which the data will be used.

Lawful Basis
for Sharing
Data

Data will be shared under the legal duty of the Control of Patient Information Notice which is described below. The COPI notice is due to expire on the 30th September 2020 at which time it may be extended. This Data Sharing Agreement would also then be extended in line with the COPI Notice, but to no later than the 30th March 2021, at which time there will be engagement with data controllers to establish a new legal basis for data sharing, together with a new Data Sharing Agreement.

Legal Duty of Control of Patient Information (COPI) Notice COVID-19

Under the COPI notice for COVID-19 all providers of healthcare, GP Practices and Local Authorities have been given legal notice to support the processing and sharing of information to help the COVID-19 response under **Health Service Control of Patient Information Regulations 2002**. This is to support the processing and sharing of information to help the COVID-19 response. This sets out that confidential patient information can be used and shared appropriately and lawfully for purposes related to the COVID-19 response.

Please see link to the COPI Notice [here](#).

This allows the processing of confidential patient information, including disseminating to a person or organisation permitted to process confidential patient information, including disseminating to a person or organisation permitted to process confidential patient information under Regulation 3(3) of COPI.

Legal Basis under the General Data Protection Regulation (GDPR)

Below explains how this agreement is also compliant with GDPR also

6 (1) (c) processing is necessary for compliance with a legal obligation to which the controller is subject

6 (1) (e) Necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the controller

9 (2) (h) Necessary for the purposes of preventive or occupational medicine, for the assessment of the working capacity of the employee, medical diagnosis, the provision of health or social care, or treatment or

the management of health or social care systems and service.

9 (2) (i) Necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the controller.

Common Law Duty of Confidentiality

The Common Law Duty of Confidentiality is set aside by the COPI Regulations

Access Controls

Role Based Access Controls

Role Base Access Controls (RBAC) will be applied to a set of 'data marts' as follows:

Patient Identifiable Data: Only those with a legitimate direct care relationship with the individual will be granted access. Access will be granted by individual data controllers and for GP Practices for their populations as the data controller.

Pseudonymised Data: CCG and Local Authority Staff will be granted access for the purposes described in 'Section 3: Purpose of data sharing' All analytical projects undertaken with the data will be listed in the Data Access and Asset Matrix (see 'Governance' Below) explaining the specific purpose, requestor, output and timescale.

Pseudonymised and non re-identifiable Data: Research bodies can be granted access to specific data extracts of pseudonymised non-identifiable data for the purposes described in 'Section 3: Purpose of data sharing'. Access will be granted on a project by project basis through the control mechanism described in the section 'Governance' below

Anonymised-aggregate Data: Access to staff employed by organisations listed in Section 3: 'Parties to this sharing agreement' will be granted access.

Governance

The programme will maintain and strictly enforce a Data Access and Data Asset matrix to ensure requests to use the CIPHA regional data sources ensure full compliance to the COVID-19 purposes as given in 'Section 5: Purpose of sharing'

This process will be governed through a regional group that will draw its membership from: the regional Clinical Informatics Advisory Group (CIAG); GP and Local Medical Committees; clinical IG specialists; and the regional Data Services for Commissioners Regional Offices (DSCRO) service.

This matrix will detail projects undertaken with the pseudonymised data by the place based intelligence Teams and be made available to parties

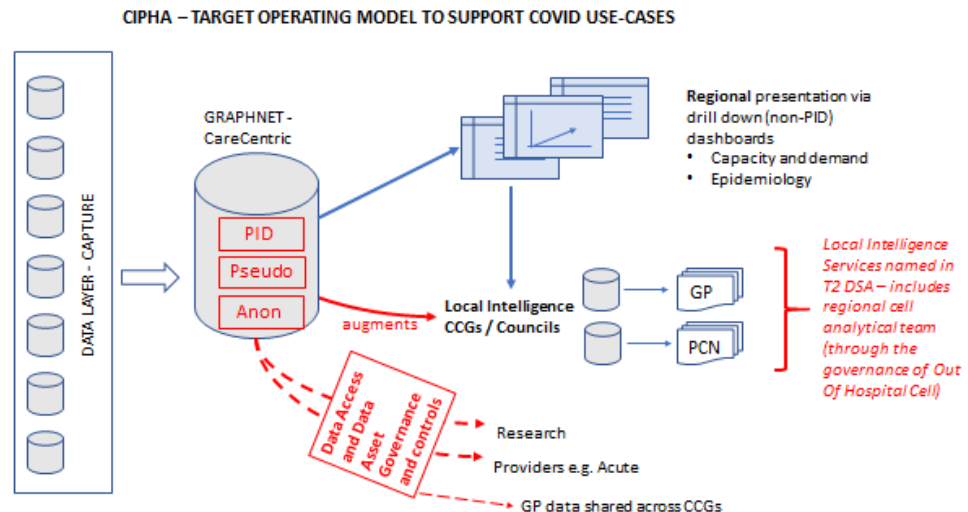

within this sharing agreement on a monthly basis, so they are informed of the specific uses of the data.

A process will be put in place for approval of projects on a case by case basis for organisations other than place based intelligence teams eg research bodies using the following principles.

- Purpose aligns with the purpose of this agreement
- Any application includes a separate data sharing agreement where the group acts on behalf of the signatories to this agreement.
- Individual data controllers will have 5 working days to opt out.

The schematic below describes the model to support the COVID-19 response and use cases.

De-identification, data minimisation, and handling of restricted/sensitive codes

De-identification of Patient Identifiable Data (Pseudonymisation)

De-identification is achieved through secure and robust pseudonymisation (Encryption method: SHA256). This allows data to be effectively linked without using clear or sharing patient identifiers. This data will still be at person-level, but the identifiable fields will be removed from the data. This includes removal of names and addresses. Date of Birth will be formatted to age; post code will be shortened. Pseudonyms will be linkable across datasets. Re-identification will be possible via a set of controlled processes for those who have been granted the correct permissions.

Anonymised Data

Anonymised data will meet the ICO standards for anonymisation including small number suppression.

Sensitive Codes

Sensitive data excluded from retrieval follows the recommendations made

by The Royal College of General Practitioners (RCGP) ethics committee and the Joint GP IT Committee:

- Gender reassignment.
- Assisted conception and in vitro fertilisation (IVF)
- Sexually transmitted diseases (STD)
- Termination of pregnancy

National
Data Opt
Out
Programme
and COPI
Notice

Type 1 opts out (those who do not want their information shared outside of General Practice for purposes other than direct care) will be upheld. This means that data for people who have objected to sharing their data will not flow from the GP record into the Graphnet solution.

Fair
Processing

Organisations party to this agreement will comply with Fair processing guidelines ensuring Privacy Notices accurately reflect the uses of data for their organisation.

A project specific fair processing notice will be available on a public facing project website

Details of
retention
and
destruction

The data will be retained for as long as the purpose(s) described above remains valid or a new legal purpose agreed.

**Workstream: COVID-19 Intelligence
Data Sharing Agreement (Tier Two)**

Signatory Sheet

Each party to this Data Sharing Agreement (Tier Two) is required to complete & sign below.

**Data Sharing Agreement Owner – Host Organisation - St Helens and Knowsley

ANNEX B – Data to be shared.

The specific data items will only be coded (structured) data, that is to say no free text (unstructured) data. As noted in the section on access controls the data will be strictly governed as anonymised-aggregate, pseudonymised and only as person identifiable for the purpose of direct care. Additionally for use cases beyond those given in this agreement there will be the additional governance of a Data Access and Data Asset Group to ensure full compliance of the COVID-19 purpose as stated in this agreement.

This Annex provides tables showing the categories of data to be shared from GP; Acute; Mental Health; Community; and Social Care (children and adult). The table includes a brief description of the data categories and the use case(s) within which the data will be used.

Use case 1 – Demand and Capacity

Use case 2 – Epidemiology

Use case 3 – Population Stratification

Use case 4 – Local Place Based Intelligence teams doing what is listed in COPI notice:

3. Covid-19 Purpose.

3.1 A Covid-19 Purpose includes but is not limited to the following:

- *understanding Covid-19 and risks to public health, trends in Covid-19 and such risks, and controlling and preventing the spread of Covid-19 and such risks;*
- *identifying and understanding information about patients or potential patients with or at risk of Covid-19, information about incidents of patient exposure to Covid-19 and the management of patients with or at risk of Covid-19 including: locating, contacting, screening, flagging and monitoring such patients and collecting information about and providing services in relation to testing, diagnosis, self-isolation, fitness to work, treatment, medical and social interventions and recovery from Covid-19;*
- *understanding information about patient access to health services and adult social care services and the need for wider care of patients and vulnerable groups as a direct or indirect result of Covid-19 and the availability and capacity of those services or that care;*
- *monitoring and managing the response to Covid-19 by health and social care bodies and the Government including providing information to the public about Covid-19 and its effectiveness and information about capacity, medicines, equipment, supplies, services and the workforce within the health services and adult social care services;*
- *delivering services to patients, clinicians, the health services and adult social care services workforce and the public about and in connection with Covid-19, including the provision of information, fit notes and the provision of health care and adult social care services; and*
- *research and planning in relation to Covid-19.*

Social Care – Child

NOTE: no free text will be extracted. Only coded data

Item (data spec doc cross reference)	Field Name	Description	COVID Use Case
3.1	Extract Identifier	Reference data item	Reference data item
3.2	Person Core	Patient Identifiable Data	Use Case 3: Population Stratification. Re-id for direct care purposes only
3.3	Person Extended	Patient Identifiable Data	Use Case 3: Population Stratification. Re-id for direct care purposes only
3.4	Referral	Open referrals and referrals that have closed since a predefined number of months prior to go live of the export.	Use Case 1: Demand and Capacity Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.5	Event	The data range of active events or which have an end date after the predefined number of months prior to go live of the export: <ul style="list-style-type: none"> • Assessment • Meetings • Case Notes <p>This does not include the free text associated with the event</p>	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.6	Alert	Alerts of the following types that are still active or have an end date after the predefined number of months prior to go live of the export: <ul style="list-style-type: none"> • Child Protection • Child in Need • Child Looked After • Missing Person • Hazard • MARAC 	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice Proposal: due to sensitive nature of codes this category may be excluded from the extract Risk: The population cannot be stratified for this vulnerability; Planning intelligence and research insight about this population cannot be produced
3.7	Disability	Disabilities that are still active or have an end date after the predefined number of months prior to go live of the export.	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as

			outlined in the COPI Notice
3.8	RelatedPerson	Relationship Types and Relationship Flags	Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.9	Practitioner (staff type)	Only those Practitioner involvements that are still active or have an end date after the predefined number of months prior to go live of the export.	Use Case 1: Demand and Capacity
3.10	Classification	Primary Support Reasons that are still active or have an end date after the predefined number of months prior to go live of the export: may include: <ul style="list-style-type: none">• Physical support – Access and mobility• Social support – Substance misuse• Sensory support• Mental Health support• Learning Disability support	Use Case 2: Epidemiology Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice

Social Care – Adult

Item	Field Name	Description	COVID Use Case
3.1	Extract Identifier	Reference Data Item	Reference Data Item
3.2	Person Core	Patient Identifiable Data	Use Case 3: Population Stratification. Re-id in controlled environment for direct care purposes only
3.3	Person Extended	Patient Identifiable Data	Use Case 3: Population Stratification. Re-id in controlled environment for direct care purposes only
3.4	Referral	Open referrals and referrals that have closed since a predefined number of months prior to go live of the export.	Use Case 1: Demand and Capacity Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.5	Event	Consider the data range of active events or which have an end date after the predefined number of months prior to go live of the export: <ul style="list-style-type: none"> • Assessment • Safeguarding • Organisational Safeguarding Case • Deprivation of Liberty Safeguards (DOLS) 	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.6	Alert	Alerts that are still active or have an end date after the predefined number of months prior to go live of the export. <ul style="list-style-type: none"> • Risks • Special Factors 	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice Proposal: due to sensitive nature of codes this category may be excluded from the extract Risk: The population cannot be stratified for this vulnerability; Planning intelligence and research insight about this population cannot be produced
3.7	Disability	Disabilities that are still active or have an end date after the predefined number of months prior to go live of the export.	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.8	RelatedPerson	Relationship Types and Relationship Flags	Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice

3.9	Practitioner (staff type)	Only those Practitioner involvements that are still active or have an end date after the predefined number of months prior to go live of the export.	Use Case 1: Demand and Capacity
3.10	Classification	Primary Support Reasons that are still active or have an end date after the predefined number of months prior to go live of the export: may include: <ul style="list-style-type: none"> • Physical support – Access and mobility • Social support – Substance misuse • Sensory support • Mental Health support • Learning Disability support 	Use Case 2: Epidemiology Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.11	Care Plan	Care plans linked to referrals that have been exported in the Referral data file that are still active or have an end date after the predefined number of months prior to go live of the export.	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.12	Service Provision	All service provisions linked to care plans that have been exported in the Care Plan data file should be included. Those that are still active or have an end date after the predefined number of months prior to go live of the export should be exported.	Use Case 2: Epidemiology Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
3.13	Care Plan Need and Outcome	All needs and outcomes linked to care plans and service provisions that have been exported in the Care Plan data file.	Use Case 3: Population Stratification Use Case 4: Place Based COVID related analysis as outlined in the COPI Notice
